

ASUNDER

HOW TO PLAY

The Premise

Enter the mind of a person torn asunder by guilt and self-doubts. Relive painful events of your past and work through the memories to reassemble your fragmented self. Find your missing body parts and combine their unique abilities to progress!

The Goal

- Collect all lost body parts
- Find a way to leave the Protagonist's mind

The Controls

In Asunder, you can play with mouse and keyboard or using a gamepad. At any time in the game, you can switch back and forth between the supported devices.

The Premise

Each body part you find unlocks a new ability for you to use.

Use the legs to run up certain walls in the level. Do not stop! If you are not fast enough, you will not make it to the top of the wall.

Unleash a powerful breath of wind using the torso. You can push and displace movable objects within a certain range.

The arms grant you access to a hook shot. Aim at a solid surface nearby and fire the hook to reach that surface.

The Installation

- Visit the link and download the “Asunder.ZIP” archive:
